

UAP
LIMITED

Introduction

UAP Limited was established in 1996 and has since become a leading UK supplier and distributor of decorative door hardware and specialised Locksmith tools and security products. With 18 years of quality products, excellent service and competitive prices, UAP has grown from strength to strength, year on year and expanded significantly. We have an in house Research & Development Department, meaning we are constantly enhancing our current ranges as well as introducing innovative state-of-the-art products that are not only practical and beautifully designed, but also put through stringent quality control checks at every stage of development. From door knockers, door viewers, letterplates, letters and numerals to cylinder locks, security products and more, all of our products are available in a wide range of sizes, colours, materials and finishes to ensure we can meet every possible requirement.

An ethical approach to business

'Quality Products That Don't Cost The Earth' isn't just our sales slogan, but a statement about our wider philosophy.

It means we value our people and our planet and we are keen to make a positive difference to the wider communities we touch through our work and via the profits we make.

For everyone at UAP, our ethical policy isn't just a statement that is allowed to gather dust in a file somewhere, but rather something we all show through taking real action. So in practice this means;

Reducing our carbon footprint

Thanks to the UK registered charity 'www.pattfoundation.org' we have offset all of our carbon emissions. We have funded the planting of more than 56,000 trees over the course of a three year reforestation project, which will enable the reintroduction of many endangered and native wildlife. We have also finished the installation of solar panels on our buildings.

School projects

After teaming up with local charity, DCWC Nepal, we have helped to fund the building of 5 much needed community primary schools in one of the poorest countries in the world. Before the scheme, children as young as 5 years old had to endure an exhausting and dangerous 4 hour walk to and from school, 6 days a week. To raise awareness of this worthy cause, we have worked closely with former Coronation Street star Sean Wilson, best known as Martin Platt, who opened the schools on our behalf. To date, the scheme has given more than 1,000 children the opportunity to learn and better their lives.

Charity support

In 2010, we hosted a Charity Ball to raise vital funds for DCWC Nepal to immunise 10,000 children from tuberculosis. In the wake of the 2011 tsunami and earthquake disaster in Japan, we supported the Red Cross through donations. We have also supported Comic Relief through the charity bids known as Twit Relief. On top of this, several members of staff participate in charity runs every year to raise money for The Christie and Breast Cancer Research UK.

Brands

UAP

Our outlet for decorative door hardware and security products for the trade.

MAX6MUM SECURITY®

Our outlet for decorative door hardware and security products for the retail market.

TradeLocks

Our outlet for specialised locksmith tools and security products for the trade.

Hidden Fix

Our patent applied for technology which leaves no visible signs of product fixings to doors.

Salamander®

Our fire check product range which will resist the spread of fire for up to 60 minutes.

Nanocoast®

Our pollution and corrosion resistant product range made from 304 grade stainless steel with lifetime coating guarantees.

Anti-Vandal™

Our products that are safer by design to protect products and property from vandalism.

48 Hour Delivery Policy*

Our 48 hour delivery promise is targeted on all stocked products.

5 Year Product Guarantee

All products inside this brochure come with up to a 5 year guarantee except the Nanocoast® range which is a lifetime coating guarantees.

Salt Spray Testing

All of our door letters and numerals in this catalogue have been salt spray tested to ASTM B117 for 480 hours, apart from the Nanocoast® range which has been salt spray tested for 2,000 hours.

Anodised Coatings

The anodised coating used on our Aluminium door letters and numerals conform to ISO 7599 AA15 and comes with a 10 year colour fastness guarantee.

Guarantee

The guarantees mentioned in this brochure are for guidance only and unless otherwise stated, only relates to products being used in inland areas which are defined as 25 miles from the coast, or 5 miles from highly polluted industrial areas. Please ask your UAP account manager for copies of the guarantee wording covering your product of interest and please talk to your account manager about any specific application you might have.

*48 hours means 2 working days. Product colours may vary slightly from the actual photograph.

Our Nanocoast® range of products are specifically designed for areas which are within a 25 mile radius of the coast, or within 5 miles of highly populated industrial areas. Made from 304 grade stainless steel, each product in the range has been salt spray tested to ASTM B117 for 2,000 hours, and comes with an industry first LIFETIME coating guarantee, as the products will not pit, rust or corrode no matter what environments you put them in!

Why Have We Used 304 Grade Stainless Steel?

We believe 304 grade stainless steel is the perfect grade of stainless steel to use at the coast for the cost price versus performance of the products. 304 grade is an austenitic stainless steel, containing 18% chromium and 8% nickel, and also a low carbon content. Due to this it has an excellent corrosion resistance in a wide variety of environments, and has good resistance to oxidation.

Downgrading the stainless steel quality to a 200 series grade stainless steel, means that even though they have similar mechanical and physical properties to the 304 grade, there is decreased nickel content. The nickel is replaced by manganese which results in weak corrosion resistance, and high carbon content leaves the stainless steel susceptible to stress corrosion cracking. Upgrading to 316 grade stainless steel is a lot more expensive than 304 grade stainless steel, which will dramatically put up the price of products, and only slightly increases the corrosion resistance as it contains 18% chromium and 10% nickel. However it shares similar characteristics to 304 grade stainless steel in resistance to oxidation and durability. 316 grade is usually used when you need a higher resistance to solutions such as sulfuric acid and chlorides at high temperatures.

Features and Benefits

- All products made from 304 grade stainless steel
- Salt spray tested to ASTM B117:2005 for 2,000 hours
- LIFETIME coating guarantee ANYWHERE in the country
- Doesn't rust or pit at the coast
- Huge range of suited and colour matched products
- Available in 3 finishes:
 - Mirror Polished, PVD Gold and Satin Stainless
- Competitively priced

Self-Adhesive Numerals

The self-adhesive Times Roman font front door numbers and letters easy to fit and long lasting. With no skill or tools required to attach the numeral to the door, they can be fitted to any door or wall surface. Each digit is secured to the door using an industrial closed cell tape which is watertight, stopping water getting behind the digit to prevent rusting.

Available in

Can be removed if necessary with no damage to the door

Fits to any surface

Highly industrial closed cell foam tape

Make no markings on the door as there are no screws

Super strong waterproof adhesive covering stops water getting behind the digit to prevent rusting
