# Make YOUR door

# MAX6MUM<sup>®</sup> SECURITY

Most burglars break in through a door. Snapping the lock, forcing the door or even fishing through the letter box for keys are all ways intruders gain entry. But not all thieves break in, some try to trick or con their way into homes.

# 6

## Decorative Door Digits

Our bright letters and numerals stand out in the dark making it easier for emergency services to find you.

## Door Knockers

Add a stylish finishing touch to your door with one of our many designs of beautiful door knockers, available with our unique hidden fixings. You can even add a door viewer for extra security.

## High Security Door Handles & 6 Pin Euro Cylinder

Our high security handles offer the ultimate protection against forced entry and lock tampering. When fitted with our British Standard Kitemark and Police approved **MAX6MUM SECURITY** cylinder lock, they achieve a combined 3 star rating to TS007<sup>1</sup>.

- Anti-snap • Anti-bump
- Anti-pick • Anti-drill

Secured by Design

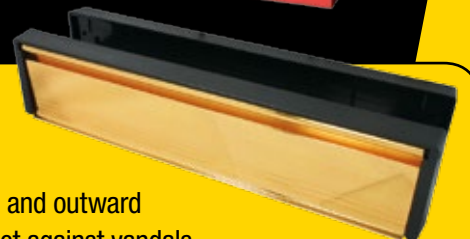

Official Police Security Initiative

<sup>1</sup> TS 007 is a technical specification that compares levels of security amongst locks and door furniture, such as handles. Hardware that meets the standard offers protection against snapping, bumping and other forms of cylinder attack. The highest grade is 3 star.

## Anti-Vandal™ Letterplates

Tamper proof fixings and outward facing brushes protect against vandals and intruders whilst also providing better draught proofing, saving you energy and money.

Secured by Design

Official Police Security Initiative

“ **MAX6MUM SECURITY** cylinder locks and security on your new door will protect your family and loved ones against not only forced entry, but bogus callers too. ”

**MAX6MUM SECURITY**<sup>®</sup>

**Door Chain & Guards**

Extra strong chain link welds withstand extreme force. If you have limited hand movement opt for our easy to use Door Guard that has a solid restrictor bar.

**Identity Card Entry Slot**

Easily check visitor's ID cards without having to open the door or awkwardly fumble with the letterplate. Show bogus callers you are aware and prepared with these excellent deterrents.

**Door Viewers**

These door viewers give clear views for easily and safely seeing who's at your door. If you have visual impairments or are a wheelchair user, the ultra wide angle option is ideal as it can be used from 2 metres away.

**Letterplate Restrictor Shroud**

This must have security accessory stops the serious problem of key fishing by restricting the opening of the letterplate flap; this stops unwanted hands being able to manoeuvre a rod or tool inside to "fish" for keys and valuables.

**MAX6MUM ASSURANCE Guarantee**

**MAX6MUM SECURITY** Doors are backed by the **MAX6MUM ASSURANCE** guarantee against lock bumping giving you up to £2,500 cover for loss.
