

NARROW TS003 DOOR CHAIN

TS003:2102 is the most up to date specification for door chains and limiters and is used in numerous standards within the industry including Secured by Design.

In order to reach TS003:2012, a door chain is tested to see if it can withstand the effects of extreme and repeated force and abuse. The product is put through tests of both 'attack mode' and 'abuse mode' and if it is still intact after these tests have been carried out then it will pass.

NARROW TS003 DOOR CHAIN

Improving door security requires protection not only against break-ins while homeowners are away but also protection from intruders knocking at the front door. The impressive UAP Narrow Door Chain is the perfect choice for all.

The UAP Narrow Door Chain is made from high grade steel, however what makes it stand apart from other door chains is that it can exceed a breaking force of over 2kN (200kg). This is achieved by each link in the door chain being individually machine welded!

Awarded 'Secured by Design' approval

Polished Chrome

1 Hour Fire Rated

Machine welded links makes the chains extra strong

Polished Brass

Exceeds breaking forces of over 2kN (200kg)

Suitable for every type and door size

Satin Silver

Made from high grade steel

Door Chain Length – 220mm

Number of Links – 10 Links

Link Thickness – 3mm

Link Width – 12mm

Receiver Plate Length – 43mm

Receiver Plate Width – 38mm

Chain Holder Length – 62mm

Chain Holder Width – 14mm

Finishes	Backplate 219mm	Material	Coating Guarantee
Polished Chrome	DCCHN-TS003	Steel	2 Years
Polished Brass	DCBN-TS003	Steel	2 Years
Satin Silver	DCSSN-TS003	Steel	2 Years
