9G Extended 2 in 1 Pick
TL2IN17GEXTENDED

Ideal for smaller safe locks with extended security such as steel or concrete doors

Universal 7 Gauge 2 in 1 Safe Pick Set

The Universal 7 Gauge 2 in 1 Pick Set allows you to make up a pick based on the lock you are trying to defeat. This is done through adjustment of the picking tip and tension tip of the lock tool. Included in the set are 5 different tips which can then be mixed and matched to allow up to 25 individual variations, so as to create the ultimate lock tool for the lock you are working with.
