SECURITY

Affordable door
and window
security products

UAP
LIMITED

www.MAX6MUM-SECURITY.com

Introduction

MAX6MUM SECURITY® was established in 2012 after it became apparent that there was a need in the market for architecturally specified door security products that were both affordable and high quality. Following this realisation we developed a retail range of door security products that meet this criteria as well as being fit for purpose and easy to install.

The MAX6MUM SECURITY® range has been designed to offer homeowners protection against common burglary methods such as bogus callers, lock snapping, lock manipulation and key fishing.

The product range includes high security door handles and 6 pin euro cylinder locks, 6 lever mortice locks, decorative door digids, door knockers, door viewers, door chains and guards, anti-vandal™ letterplates, restrictor shrouds and the unique identity card slot. All have been designed to protect homes against break-ins and bogus callers. We also offer window security and safety solutions with our window restrictors and sash jammers.

MAX6MUM SECURITY® is presented in high impact yellow and black blister packaging which has been designed to stand out on your shelves. Each pack contains required fixings and full fitting instructions.

To help you sell MAX6MUM SECURITY® products the range is backed by extensive marketing support. This includes point of sale materials such as open/close door signs, leaflets and leaflet holders, posters, brochures and a life size cut out of our very own superhero Max. We can tailor any of our marketing literature to meet your requirements, this can involve adding your logo, company name and contact details.

Max, an animated superhero, is the face of MAX6MUM SECURITY®; he features on product packaging and marketing materials. Max has twin toddlers Milo and Millie who are used to market the Baby and Child Window-Safe™ Restrictor. All three characters star in our TV advert for the window restrictor. The video aims to raise awareness of the issue of children falling from windows.

Other marketing tactics include radio, online and print advertising, use of social media, a consumer website, sponsorship of Leeds United Football Club's South Stand and an iPad app.

All of this is working towards our goal of turning MAX6MUM SECURITY® into the leading home security brand.

Anti-Snap Security

We have a range of door security products that have been designed to combat the common burglary method of lock snapping. This method involves exploiting vulnerable euro cylinder locks and door handles by breaking the door handle and then applying force to the end of the exposed cylinder. Burglars can then access the cam to unlock the door.

Our anti-snap euro cylinders and high security door handles offer unbeatable protection against lock snapping.

UAP+ ZeroLift Advance Euro Cylinder

anti-snap

Sacrificial snap cut lines on both sides of cylinder means the cam remains intact and inside the door

anti-bump

A patented system of timing pins control the physical timing of the pins when the cylinder is bumped

anti-drill

Four hardened steel pins each side of cylinder are positioned to prevent drilling attacks

anti-pick

Three steel anti-pick pins in each side of the cylinder

- Secured by Design
- TS 007 1* Bsi Kitemark
- Available as standard or thumbturn
- Polished brass or nickel

MAX6MUM SECURITY® High Security Door Handle

- 2* Kitemarked and Secured by Design
- Integrated cylinder guard to resist drilling attacks
- Self-adhesive backing tabs to add to the attack resistance and to assist easy fitting
- Self-adhesive backing tabs aid water penetration resistance
- Protects against cylinder and handle snapping
- Aero-space grade aluminium based – black, white, gold anodised and silver anodised
- 304 grade stainless steel based – satin stainless steel, PVD gold and mirror polished stainless steel. Lifetime guarantee against surface corrosion

Window Security

MAX6MUM SECURITY® Baby and Child Window-Safe™ Restrictor

According to a recent study, 4,000 children under the age of 15 fall out of a window every year. Our window restrictor has been designed to prevent this from happening. The restrictor has a 20cm steel cable to restrict the opening of the window to a maximum of 10cm. This stops anyone being able to fall out of the window, whilst at the same time allowing air circulation into the property.

- Affordable, high quality and easy to install
- MRSA resistant plastic used to kill the MRSA virus
- Independently tested to relevant parts of EN 16281:2013
- Exceeds strength requirements withstanding a minimum force of 1350N
- Can withstand forces over 100kg
- A key is provided so the window can be opened in an emergency.
- Suitable for all windows and doors including UPVC, wooden, composite and metal profiles
- Available in white and brown

MAX6MUM SECURITY® Sash Jammer

Sash Jammers are a must have security device for uPVC windows and doors. They offer quick and low cost additional security for the home.

The Sash Jammer has a securing arm which, when positioned over the frame, prevents the levering of the sash or door leaf – a common entry method for burglars.

4,000
children under the
age of 15 fall out of
windows each year

Bogus Callers

Not all thieves break in, some try to trick or con their way into homes. We have a range of security products that will help householders to determine the trustworthiness of their visitor before opening the door.

Door Viewers

Add the perfect accessory to your door with the MAXIMUM SECURITY® door viewer. Made with solid brass and comprising of 3 plastic lenses, it ensures to give crystal clear performance for years of safe, secure use.

Available in polished brass and polished chrome, white powder coat, black powder coat, gold anodised and silver anodised.

Small Door Viewer

- 20-35mm opening
- 12mm barrel
- Suitable for uPVC doors
- Secured by Design

Wide Angle Door Viewer

- 35-55mm opening
- 12mm barrel
- Suitable for composite and wooden doors
- Secured by Design

Standard Door Viewer

- 35-55mm opening
- 12mm barrel
- Suitable for composite and wooden doors
- Secured by Design

ID Card Entry Slots

Our unique ID card entry slots enable the householder to safely check the callers identification without having to open the door or fumble awkwardly trying to accept the card through the letterplate. They simply lift up the sliding latch to accept the card through the slit and can then comfortably verify the ID without the caller lingering in the doorway.

- Check a callers ID without opening the door
- Act as a deterrent for bogus callers
- 20-40mm for uPVC doors
- 40-80mm for wooden and composite doors
- Mirror polished stainless steel and PVD gold – Produced from stainless steel
- Black, white, chrome effect and gold effect – Produced from zamak

Door Chains and Guards

Sliding Door Chains

- Exceeds breaking force of 200Nm
- Chrome, brass and satin silver
- Individually soldered links

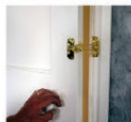

Narrow door chains

- Exceeds breaking force of 200Nm
- Chrome, brass and satin silver
- Individually soldered links

Extra Strong Door Guard

- Ideal for someone with limited hand movement

Letterbox Security

Anti-Vandal™ Letterplate

Anti-Vandal

Brushes on the outside prevent vandals from putting unwanted items, such as fireworks, into the cavity

Anti-Snap Flap

180 degree opening, meaning that the flap will not be snapped off when opened too far

Anti-Burglar

Blind bolts to the exterior prevent the outer frame being unscrewed from the door externally

Anti-Scratch Frame

Matt coated frame conceals scratches that may be caused by screwdrivers during installation

- 12 inch with black or white frame
- 20-40mm opening for uPVC doors
- 40-80mm opening for wooden and composite doors
- Secured by Design
- Conforms to BS/EN 13724
- Aluminium based – Black powder coat, white powder coat, gold anodised, silver anodised, white flap and frame
- 304 grade stainless steel based – PVD gold, mirror polished stainless steel, satin stainless steel – lifetime surface coating guarantee

MAX6MUM SECURITY® Mail Bag

Our Mail Bag is the ideal solution for anyone concerned with security, once installed it becomes impossible to "fish" for keys or manipulate the lock.

- Specifically designed for UAP 12" Letterplates – universal frame will fit all UAP up stands
- Slim, lightweight design with a snug fit
- Stops key fishing and lock manipulation
- Consists of fire retardant uPVC frame
- Zipped pouch for mail collection
- Available in white, bronze and suede black

Letterplate Restrictor Shroud

- Prevents Key fishing
- Stops the inner flap opening more than 40 degrees
- Easy to install – can be fitted in minutes
- Fits any 12" UAP letterplate
- 14.5" long
- Available in gold anodised, silver anodised, black, white, mirror polished stainless steel and PVD gold
- Comes with hidden fixings

Letterplate Restrictor Shroud Extension

- Suitable for the Hidden Fix Restrictor Shroud
- Meets TS008:2012 standards when combined with the restrictor shroud
- Prevents lock manipulation by preventing straps being put around the internal thumbturn cylinder from the outside, and turning it to open
- Colour matches the letterplate restrictor shroud finishes

Door Hardware

Decorative Door Digit

These 3" self adhesive letters and numerals are easy to fit and don't require the use of screws. They are available in numerals 0-9 and letters A-C.

No skill or tools are required to attach the numeral to the door, and they can be fitted to any door or wall surface. Each digit is attached using an industrial closed cell foam tape which is watertight, stopping water getting behind the digit to prevent rusting

Brass based

– Brass and black

Aluminium based

– Silver anodised and gold anodised

304 grade stainless steel based

– PVD gold, mirror polished stainless steel and satin stainless steel
– Lifetime guarantee against surface corrosion

6" Victorian Urn Door Knockers

Our 6" Victorian Urns are available as bolt through or Patented Hidden Fix, with or without a spynole and in 8 different colours and 3 different bases.

Brass based

– Polished brass, polished chrome, black powder coat and white powder coat

Aluminium based

– Silver anodised, gold anodised, black powder coat and white powder coat

304 grade stainless steel based

– Lifetime guarantee against surface corrosion
– PVD gold, mirror polished stainless steel and satin stainless steel

Hidden Fix Door Knockers

- Unique and patented fixing method
- Makes seeing bolts on the back of the door a thing of the past
- Fixes to the door using a 'lollipop'
- Waterproof seal stops rusting behind the door knocker

6 Lever Mortice Lock

- Conforms to British Standard BS 3621:2007
- Six Levers and extended warding with superior anti-pick protection
- Hardened steel anti-drill plates on both sides
- Heavy duty steel box striker
- Registered design restricted keyway for extra security
- Over 6,000 key variations
- The easiest latch reverse in the world (Patent Protected)
- Tested to BS EN 12209:2003
- Sash Lock and Dead Lock available
