Baby and Child Window-Safe™ Restrictor

The Royal Association for the Prevention of Accidents report that each year 4,000 children under the age of 15 fall out of a window. We have recently launched a simple, affordable and very effective solution to this in the form of the MAX6MUM SECURITY Window Restrictor.

Our Window Restrictor can be fitted to any window in minutes; it has a 20cm long cable to restrict the opening of the window and the whole device can withstand forces over 100kg. This means the householder can have their window open without the worry of their children falling out.

We have independently tested the Window Restrictor to EN 16281:2013 to test the strength, it exceeds the strength requirements, withstanding a minimum force of 1350N. A cord cutting test was also carried out to 3600N, which the restrictor passed.

The MAX6MUM SECURITY Window Restrictor is suitable for uPVC, Wooden, Composite and Aluminium Doors. It is also available in MAX6MUM SECURITY retail packaging.
