- Written by leading auto locksmith experts Martin Pink, Tony Audsely and Jim Hetchler
- Covers over 35 locks in detail
- Step by step picking instructions
- Learn all the tricks of the trade

Available now at

Take a look at the fantastic range of Genuine Lishi Night Vision tools

- Read the decode grid anywhere
- No power needed, not even batteries
- International Patent Pending

The new Genuine Lishi App, available FREE in both Apple iPhone and Android versions, allows you to look up the applicable tool number in seconds anywhere you have mobile phone signal!

Search 'How to Use the Genuine Lishi App' on Youtube for a full tutorial

KD900

Also check out the amazing
KD900 Key Remote Generator

The Genuine Lishi key remote generators are designed to cover over 80% of remotes, and more than 100 types of transmitters can be generated for car makes including Toyota, BMW, Audi, Nissan, Hyundai, Kia, Subaru, Mazda, Ford and Honda!

Features:

- Save money on stock as 150 variants of remotes can be made
- Massively reduces stock as one single remote can be made into different part numbers
- Greatly increases your coverage with the ability to create parts that would normally be specially ordered
- Can be easily and automatically updated online

Ideal for garages, diagnostic centres, automotive locksmith and key cutting centres!

KD900 Key Remote Generator

Stand alone and has its own screen – no computer needed

GL-KD900-KRG

KD200 Key Remote Generator

Can do garage remotes!
Needs a computer or laptop to work

GL-KD900-KRG

Though a majority of the KD Key Generator Machines are free and no tokens are used, there are remote functions that will charge you tokens, and these are used on premium remotes and remotes requiring PC access to a 3rd party server to generate.

A rough guide of token costs can be found on the Tradelocks website.

Please note – In no way at all are these stick on badges associated with any car manufacturer, and applying them to any of our DIY aftermarket remotes does not mean that they are authorised or licensed by the car manufacturer. We strongly recommend that the original Genuine Lishi badge is retained for use on the key remotes.

The Genuine Lishi branded ready made remotes offer a very high quality and reliable aftermarket key suitable for many models and types of vehicle. These keys come ready to cut the blade and clone the chip.

The aftermarket remotes are available for the following car makes:

HONDA

JAGUAR

MAZDA

NISSAN

SEAT

SKODA
AUTO

VW

VAUXHALL

Please Note – None of our DIY aftermarket car keys are associated with any car manufacturer.

Genuine Lishi Key Cloner

The Key Cloner Machine is able to identify the transponder, write the transponder codes, copy the transponder and calculate the Eeprom memory. It can then calculate transponder codes and calculate the pin-codes from the Eeprom memory from using the chassis or the transponder. The machine can also test the transponder and generate fixed transponder codes!
