ADVANCE

BLACK

The Next Generation of Super Smooth Cylinders

UAP have developed a large range of 1* Kitemarked anti-snap euro cylinders which conform to EN1303:2005 standards. The cylinder has been re-engineered from our original Zerolift cylinders, and not only does it combine all the original Zerolift features, but the Zerolift Advance cylinders are also packed with even more functions:

SACRIFICIAL CUT

The cylinder has a Sacrificial cut on each side, so when force is applied to either end, the cylinder will break away to the sacrificial cut line only, leaving the remaining cylinder operational and the locking mechanism intact

ANTI BUMP

The cylinder has a unique and patented anti-bump system which does not use trap pins. This system makes the turning of the cylinder key extra smooth.

ANTI DRILL

7 x hardened steel anti-drill pins are in each side of the cylinder. Plus all moving pins are nickel plated hardened steel 50 HRC minimum.

ANTI PICK

Minimum of 3 anti-pick pins in each side of the cylinder makes it extremely difficult for a common burglar to pick the cylinder.
