

Lockable Window Restrictors

The Royal Association for the Prevention of Accidents report that each year 4,000 children under the age of 15 fall out of a window. We have recently launched a simple, affordable and very effective solution to this in the form of the UAP Window Restrictor.

Available
in six
finishes

Withstand forces
over 100kg

Suitable for all
composite
doors

Biomaster
Protected

4,000

children under the
age of 15 fall out of
windows each year

Our Window Restrictor can be fitted to any window in minutes; it has a 20cm long cable to restrict the opening of the window and the whole device can withstand forces over 100kg. This means the householder can have their window open without the worry of their children falling out.

The UAP Window Restrictor is Biomaster Protected – Protection against the dangers you can't see. Biomaster ensures effective antibacterial protection for the effective lifetime of the product, helping to keep surfaces clean and hygienic, and reduces the threat of cross-contamination.

We have independently tested the Window Restrictor to EN 16281:2013 to test the strength, it exceeding the strength requirements, withstanding a minimum force of 1350N. A cord cutting test was also carried out to 3600N, which the restrictor passed.

The UAP Window Restrictor is suitable for uPVC, Wooden, Composite and Aluminium Doors.

Lockable Window Restrictors

Testing Standards	Internally tested to relevant parts of EN16281:2013. Exceeds strength requirements withstanding a minimum force of 1350N
